

Welcome to *Bin It! to the BEAT*

Thank you for downloading our free lessons. This free multi-media educational resource has been created to help tackle the impact of littering, by supplying you with easy to use lessons and the *Bin It! to the BEAT* animation for teaching 7-11 year olds.

A fun and easy tool to help repeat the anti-littering messages in your school and make the behaviour of binning it stick. With colourful characters and a catchy tune it appeals to everyone and only takes two minutes to play.

The animation can be played before break times, at assembly or as part of lessons. Easy to use, it is there to support teaching the following key messages:

- **Litter can be anything from chewing gum to an unwanted piece of furniture**
- **No specific type of person litters – it can be a child dropping a sweet wrapper to a grown up placing a coffee cup next to an overflowing bin**
- **Less litter will save millions of pounds**
- **Put your rubbish in a bin to avoid being fined by your local authority**
- **Help keep your local area clean by holding on to your litter until you find a bin**
- **Love where you live and remember to *Bin It!***

Included in this pack are three lessons you can use with your class. They can be used as one project or individually to teach about the issues surrounding littering and inspire pupils to be creative in finding solutions to this problem. All of the lessons use the *Bin It! to the BEAT* animation as part of the learning.

Don't forget to download our free assembly plan and get the whole school to *Bin It! to the BEAT*. Just visit: **www.biniteducation.com**.

What are you waiting for, open up the lesson plans and discover fun ways for you and your pupils to take on the litter issues in your school.
